Eustaris

PRECISION BALLOON DILATION SYSTEM
FOR THE TREATMENT OF EUSTACHIAN
TUBE DYSFUNCTION

DESIGNED FOR
PRECISE DILATATION

neuwirthmedical.

Precision Designed for ETD Treatment

Eustachian Tube Dilation (ETD) has emerged as an effective treatment for patients suffering from Eustachian Tube Dysfunction.

Eustaris is a single-use, precision-engineered balloon dilation catheter system that combines excellent handling with high procedural safety.

Developed for precise navigation and reliable performance – for better outcomes.

ANATOMICAL TIP
Atraumatic and shaped for safe navigation.

SINGLE USE
Sterile single-use system for maximum safety.

HIGH PRECISION
Engineered for accurate placement and dilation.

STERILE
Individually packaged and ready to use.

RELIABLE PERFORMANCE
High-quality materials for consistent results.

TRUSTED QUALITY
Manufactured under highest quality standards.

Product Features

Engineered for Safety. Designed for Precision.

ANATOMICAL ATRAUMATIC TIP
Designed for smooth and safe introduction.

KINK-RESISTANT BALLOON SEGMENT
Stable and reliable balloon expansion.

ULTRA SLIM INSERTER & FLEXIBLE SHAFT
For precise guidance, controlled navigation and optimal access

The Complete System

Everything you need for effective ETD dilation.

ULTRA-SLIM INSERTER
For precise placement and excellent handling.

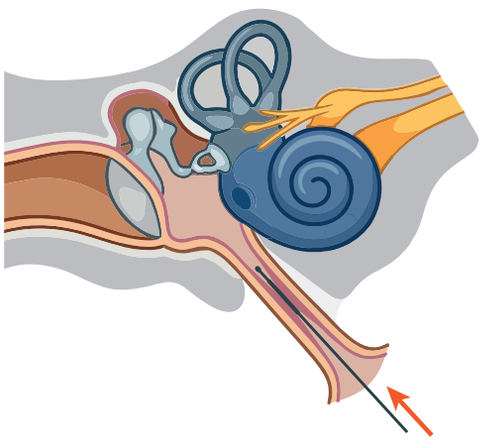

INFLATION DEVICE
High-pressure inflation device with stable pressure control.

DUAL-COMPONENT CATHETER
Catheter with high tactile sensitivity for precise feedback.

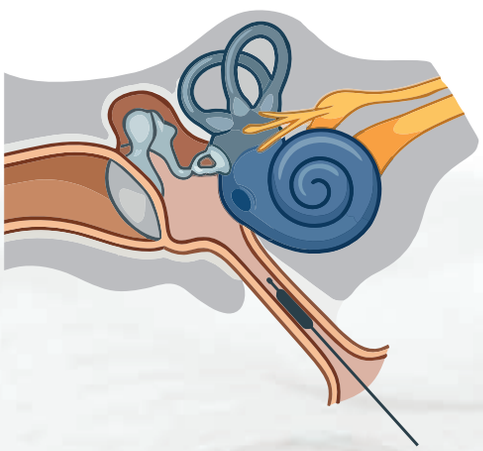

COMPATIBLE WITH STANDARD WORKFLOWS
Intuitive. Efficient. Reliable.

Simple. Precise. Effective.

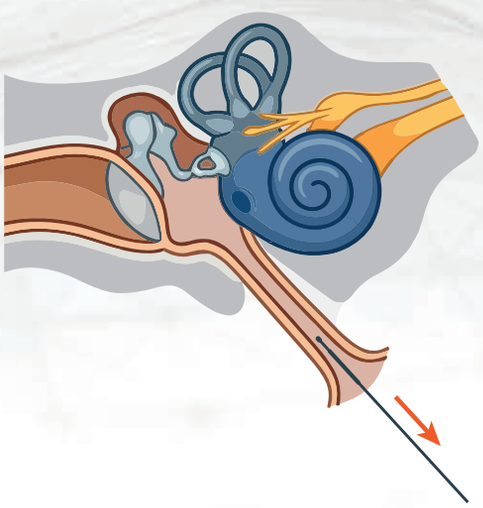

Designed for a straightforward procedure.

1 INSERT
Carefully insert the catheter into the Eustachian tube.

2 POSITION/INFLATE
Position the balloon segment at the target site and inflate it to the recommended pressure

3 REMOVE
Deflate and remove the catheter.

Clinical Advantages

Benefits that make a difference.

PRECISE PLACEMENT
Anatomical design for accurate and safe positioning.

RELIABLE DILATION
Kink-resistant balloon for controlled expansion.

EXCELLENT HANDLING
Ultra-slim inserter and ergonomic design for optimal control.

MAXIMUM SAFETY
Sterile single-use system minimizes risk of infection.

OPTIMIZED WORKFLOW
Complete system for efficient and effective procedures.
